Proceeds to the

**Alzheimer's Foundation for Caregiving in Canada
(AFCC)**

AFCC is a registered national nonprofit organization (Charitable business number: 82090 3816RP0001) founded January 11, 2008 to fill a gap that exists on the national level concerning the care component of Alzheimer's disease and related illnesses (www.alzfdn.ca) AFCC's mission is "to provide optimal care and services to individuals confronting dementia, and to their caregivers and families—through member organizations dedicated to improving quality of life."

AFCC's goals are to bring the issue of "care in addition to cure" to the national stage; to increase awareness of the disease and the importance of proper detection; to implement best practices and quality assurance standards; to provide training to healthcare professionals in order to raise the bar on care; to advocate for funding for quality support services for those with memory disorders and their families; and to assist in providing funds to local organizations and directly to families in need.
